Profile

Engineering student at INPT specializing in DevOps/Cloud, passionate about automation, software industrialization, and scalable cloud infrastructures. Currently seeking a Final Year Internship (PFE) starting January 2026 in DevOps to design, automate, and deploy reliable software systems.

Education

Engineering Degree, DevOps/Cloud National Institute of Posts and Telecommunications – Rabat, Morocco	2023 – Present
Preparatory Classes, Mathematics Physics (MP) CPGE - Charrif Al Idrissi – Taza, Morocco	2021 – 2023

Professional Experience

Kubernetes Administrator (End-of-Year Project - PFA) , Orange Maroc – Casablanca, Morocco <i>Context:</i> Management of a multi-node Kubernetes cluster to ensure high availability. - Managed a multi-node Kubernetes cluster ensuring high service availability. - Implemented strict RBAC policies and executed etcd backup/restore procedures. - Configured deployments using Helm and Kustomize for stability and maintainability. Technologies: GCP, Kubernetes, kubeadm, etcd, Helm, Kustomize, CNI, Ingress Controller, PV/PVC, RBAC, Taints/Tolerations	07/2025 – 09/2025
Frontend Developer (Internship) , Kazineuf – Rabat, Morocco <i>Context:</i> Development of an immersive 3D web interface. - Developed an immersive 3D web interface using Angular and TypeScript, improving user engagement. - Enhanced application robustness and scalability; managed code and CI/CD workflows via GitLab. Technologies: Angular, TypeScript, HTML, Tailwind CSS, GitLab	07/2024 – 09/2024

Academic and Personal Projects

INEAlumni – Full Stack Platform for INPT Community - Developed a full-stack application using Spring Boot and ReactJS for the INPT community. - Integrated DevOps practices with Docker and managed the project using GitHub and Jira in an Agile workflow. Technologies: Spring Boot, ReactJS, Java, JavaScript, GitHub, Docker, PostgreSQL, Jira
DevSecOps Pipeline for Microservices (Pitstop) - Automated the Kubernetes (Minikube) environment using Terraform; implemented CI/CD/GitOps pipeline with GitHub Actions. - Enhanced security and observability by integrating Trivy for scanning, Vault for secrets management, and Prometheus/Grafana for monitoring. Technologies: Kubernetes, Docker, Terraform, GitHub Actions, Vault, Trivy, Prometheus, Grafana
Private OpenStack Cloud Deployment and Administration Built a full IaaS OpenStack platform, configuring critical services (Keystone, Nova, Neutron). Technologies: OpenStack (Keystone, Nova, Neutron), Linux/Bash, KVM, MariaDB, RabbitMQ
Personal Portfolio Website - Designed and developed a responsive personal portfolio website showcasing projects and skills. - Implemented modern web development practices with focus on user experience and performance. Technologies: HTML, CSS, TypeScript, React

Technical Skills

DevOps Cloud : Kubernetes, Docker, Helm, Terraform, GitLab CI/CD, GitHub Actions, Jenkins, Prometheus, Grafana, AWS, GCP, OpenStack, Concourse
Programming/Scripting : Python, Bash (Shell), Java, JavaScript, TypeScript, HTML/CSS
Web Developpement : Spring Boot, React, Angular, HTML/CSS
Systems : Linux (Ubuntu, CentOS), basic Windows Server administration
Methodologies : Agile (Scrum), Jira

Extracurricular Activities

Orphan Project Leader of Social Affairs Club - Active Member of Telecom IT Club

Languages

French : Professional • English : B2 (TOEIC) • Arabic : Native
